It is our duty at USAC to anticipate oncoming change that often arrives rapidly and to provide straightforward guidance to help program participants navigate shifting landscapes in an environment of complex transactions. With flexibility and responsiveness, we worked in 2013 to connect with beneficiaries and show them a clear path towards affordable access to telecommunications and Internet services.

HIGH COST PROGRAM

The High Cost Program provides support to eligible telecommunications carriers that in turn offer rates and services to consumers in rural areas that are reasonably comparable to those available in urban areas.

LIFELINE PROGRAM

The Lifeline Program provides support to eligible telecommunications carriers that in turn offer discounts on telecommunications services to eligible consumers.

RURAL HEALTH CARE PROGRAM

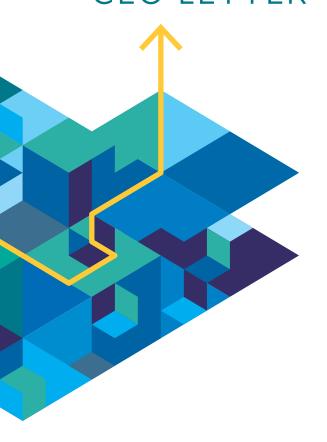

The Rural Health Care Program provides support to eligible health care providers for reduced rates for telecommunications services and broadband access.

SCHOOLS AND LIBRARIES PROGRAM

The Schools and Libraries Program, commonly known as the E-rate Program, provides support to eligible schools and libraries for reduced rates for telecommunications, telecommunications services, Internet access, and eligible products along with repair and upkeep of eligible products.

CHAIRMAN AND INTERIM **CEO LETTER**

2013 ANNUAL REPORT • UNIVERSAL SERVICE ADMINISTRATIVE COMPANY

In this annual report, you will discover how USAC spent 2013 turning big changes in universal service programs into operational realities. Across the organization, USAC built solid platforms for launching new tools and procedures that strengthened program integrity and widened opportunities for program participants. Across all universal service program areas, USAC expanded and modernized channels of communication and served as a conduit for critical data to flow among programs, stakeholders, and the Federal Communications Commission (FCC). We have made continuous progress over the years and pride ourselves on consistently discovering better ways to achieve the goals of administering the universal service support programs.

In the Lifeline Program, USAC put an enormous amount of effort into the creation of the

This database helps carriers keep track of consumers who receive Lifeline Program-supported service and is designed to prevent waste, fraud, and abuse by preventing receipt of duplicate support payments. NLAD opened with a launch in five states in late 2013 and will expand to include carriers nationwide in early 2014.

In the High Cost Program, USAC and the FCC strengthened oversight and accountability in the program through to gather data providing insights into access to broadband Internet services in the United States. USAC also launched systems improvements that sped up universal service payments, useful for initiating payments in 2013 to carriers through the new Mobility Fund and releasing Phase I disbursements of the Connect America Fund.

As soon as the Healthcare Connect Fund (HCF) Order was released in December 2012, USAC began working closely with the FCC to implement changes to Rural Health Care Program activities and focus. The

to support the formation of state and regional broadband health care networks. New forms and processes were developed to guide applicants through the changes, and USAC started processing requests for HCF Program support by early fall.

With the FCC's

the summer of 2013, USAC's ongoing work to implement software changes

beginning in

and streamline program administration will position the program well for implementing any new program rules. Sharpening the program's focus on affordable access to high-speed broadband connectivity will showcase USAC's commitment to making program changes transition smoothly for program beneficiaries and service providers. Key to this posture have been significant enhancements to the program's technology capabilities, a result of fully establishing a self-sufficient, in-house IT staff in 2013. We are eager to take further steps to improve the user experience for program participants in 2014 and beyond.

USAC made improvements to the way we collect and use data. USAC's IT and Finance teams implemented an internal budget module that significantly . USAC's Internal Audit Division found

ways to improve system processes and help the customer experience through new communication channels, expanded internal training, and more detailed data collection.

By adapting to and planning for all of the changes that universal service programs have undergone this year, USAC has registered accomplishments in operations, customer service, and administrative efficiencies. We remain grounded in our vision of connecting Americans to each other and the world.

Eight new members joined the . We welcome them and thank our longstanding Board members for their dedicated service and valuable guidance. We also want to thank USAC's experienced staff members for their dynamic work. We are pleased with our progress in 2013 and excited about what the future holds in the administering of the universal service programs.

& 2 Tallos Dr. Brian L. Talbott CHAIRMAN OF

Richard Belden INTERIM CHIEF **EXECUTIVE OFFICER**

STATEMENT FROM THE CHAIRMAN

On behalf of the USAC Board of Directors, I want to acknowledge the many invaluable contributions Scott Barash made to USAC over his 14 years with the company, first as General Counsel then as Acting Chief Executive Officer. Scott left USAC in February 2014 for a new position and a new challenge. We wish him the best in his new endeavor and thank him for shaping USAC into the highly successful organization it is today.

Fund Administration

Always working to elevate standards and encourage transparency, USAC spent 2013 refining and improving how data is collected and used.

USAC implemented Forecaster, a budgeting module that improves USAC's internal budget tracking by enhancing documentation capabilities, giving greater access to specific details along with heightened data security.

USAC operations and financial systems are now working together with applications systems more efficiently than ever before. This transition has improved business analytics, the tracking of spending and assets, and communication with stakeholders.

streamlined processes in 2013. These enhancements to operations complemented ongoing technical training for auditors in the division. Auditors received over 40 hours of

intense training. They built an elevated skill set that allows them to conduct highly complex audits of program beneficiaries and universal service fund contributors. Auditors are now prepared to conduct the in-depth and labor-intensive audits that will be necessary in years to come.

USAC looked for ways to gather feedback from customers in order to achieve a better understanding of how auditors were doing in the field. A new survey sent to customers after every audit identified areas that could use improvement. By opening these channels of communication, USAC was able to capture valuable insights that have helped improve operating procedures.

USAC ADMINISTRATIVE EXPENSES (UNAUDITED)

YEAR	EXPENSE RATE ²	USAC ADMINISTRATIVE EXPENSES	FCC OIG USF AUDIT PROGRAM COSTS ³	TOTAL ADMINISTRATIVE EXPENSES
2009	2.57%	\$ 99,591,000	\$ 87,074,000	\$ 186,665,000
2010	1.33%	\$ 102,089,000	\$ 3,337,000	\$ 105,426,000
2011	1.32%	\$ 106,542,000	\$ 205,000	\$ 106,747,000
2012	1.27%	\$ 110,880,000	\$0	\$ 110,880,000
2013¹	1.29%	\$ 107,761,000	\$ O	\$ 107,761,000

 $Notes - 1.\,USAC\,administrative\,expenses\,based\,on\,unaudited\,financial\,statement\,in\,this\,annual\,report\,for\,2013.$

- 2. Percentage shows USAC administrative expenses divided by total approved program disbursements.
- 3. FCC OIG USF audit expenses as reported in Board of Directors meetings. Does not include costs of audits done by USAC staff.

USAC finalized nearly 150 audits under the Beneficiary and Contributor Audit Program 2012-2013 plan, examining over \$92 million in

paid to program participants. The Payment
Quality Assurance Program reviewed more than
1,800 payments, and results showed that universal
service programs continue to have low improper
payment rates.

USAC also began reaching out to carriers in new ways to better communicate the consequences of failing to pay delinquent debts. As a result, USAC collected a significant portion of the delinquent debt associated with the targeted outreach.

USAC continues to deliver quality communications by effectively conveying information to stakeholders in an effort to keep them educated and informed. Through , stakeholders stay up-to-

date with universal service program changes. USAC reached almost 165,000 people in 2013, conducting 17 live training events with nearly 2,300 attendees, holding 12 webinars that drew more than 4,900 participants, sending out nearly 200 communications through email, holding regular conference calls, and participating in professional meetings.

FUND ADMINISTRATION • UNIVERSAL SERVICE ADMINISTRATIVE COMPANY

The big changes in the High Cost Program envisioned

in the FCC's 2011

continued to roll out during 2013. Designed to launch the Connect America Fund, the order transitions the High Cost Program away from support of networks that provide only voice telephone service and towards multi-purpose networks capable of also offering broadband Internet access through fixed and mobile technologies. This shift in focus prompted significant changes to USAC operations.

Central to the successful implementation of program changes . A comprehensive tool to gather data about carrier compliance and progress towards the goals of universal service, the FCC Form 481 came online in the middle of the year with great success. With over 400 data points, the form presented a complex technology challenge. USAC's IT and High Cost Program teams worked together to build a smooth interface and robust data environment, all fully integrated in ,

E-File. With the functionality of FCC Form 481 fully established, USAC is now able to provide the FCC with extensive data about how effectively program changes are working for carriers and customers to make broadband available to all areas of the country as quickly as possible.

Filers of the FCC Form 481 benefited from numerous
. Two webinars on filing
requirements attracted over 1,000 participants. Also
supported by comprehensive filing instructions,
carriers completed the filing process with high rates of
success. Nearly 100 percent of those required to file
did so by the October 15 deadline, and 94 percent did
so online.

Meanwhile, payments for Phase I support continued to grow. Focused on bringing broadband access to unserved areas, Phase I (frozen Price Cap and Incremental support) disbursements came to over \$1.3 billion in 2013. The FCC Form 481 came online in the middle of the year with great success.

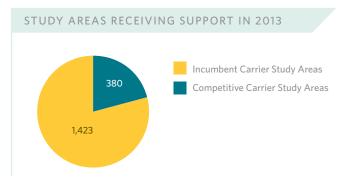

Supporting mobile access to voice and broadband services, USAC initiated payments in 2013 to carriers through the new

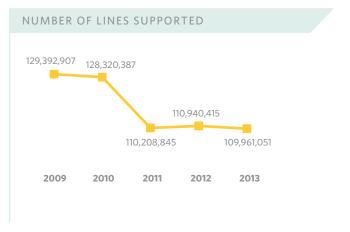

. By year's end, almost \$75 million was disbursed to carriers to bring these services to unserved areas within two to three years.

Working with the FCC, USAC developed and posted FCC Form 690, designed to capture information for the provision of mobile services just as the FCC Form 481 does for services provided to fixed locations.

While these new activities were launching, USAC continued to refine current operations. Systems improvements reduced run times for disbursement calculations by about half, bringing greater reporting capabilities. USAC can apply controls more precisely, track disbursement processes more closely, and speed up payment processing.

USAC launched the National Lifeline Accountability Database.

In 2013, USAC continued its legacy of protecting universal service and helping the right people get the right amount of support by moving forward with the creation of the

. This database helps carriers keep track of consumers who receive Lifeline Programsupported service.

Beginning in 2011 and continuing through the end of 2013, USAC conducted in-depth data validations of subscriber data that checked telecommunications carriers' records for duplicate subscribers. This effort eliminated 2.2 million duplicate subscribers and yielded program savings of over \$260 million. This savings confirmed the need to create NLAD, which would result in even greater universal service savings by preventing duplications from happening in the first place.

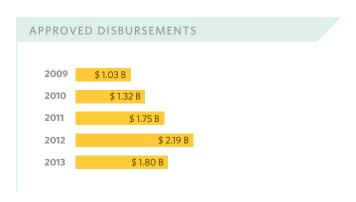

Under a tight timeline, USAC began building NLAD in May. By year's end, NLAD had launched in five states.

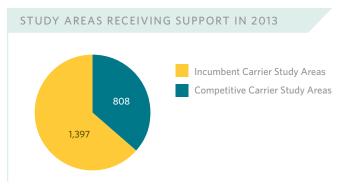

This project required collaboration among teams from various departments at USAC to write requirements, purchase software and hardware, and develop code. These highly skilled teams developed an efficient system to access carriers' subscriber data, remove duplicate subscribers, monitor carrier compliance, and retrieve money for duplicate claims.

Next, Lifeline Program staff engaged in an open dialogue with carriers through an

, including a webinar event and four collaborative, online and in-person workshops that drew 2,100 participants. During these workshops, program staff listened to carriers' concerns and received valuable input that shaped the final templates carriers would have to use.

To keep carriers in-the-know, USAC created a section dedicated to NLAD on the USAC website where they could learn about NLAD and receive guidance on recent updates. Ten video tutorials were created to educate carriers on the key functions of NLAD.

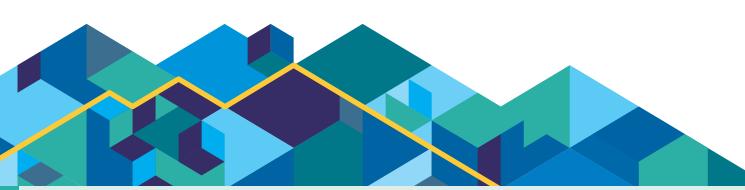

The , a regular newsletter emailed to about 2,200 subscribers, launched in November.

Further Lifeline Program reforms required consumers to recertify their eligibility for support on an annual basis, reported by carriers .

Supported by strong documentation requirements,

Supported by strong documentation requirements, the recertification process provides a mechanism to de-enroll consumers whose eligibility status changes from one year to the next. Taken together, efforts to eliminate duplicate subscribers, recertify eligibility each year, and launch NLAD have given the FCC and USAC important new tools to safeguard the integrity of Lifeline Program disbursements.

In 2013, program staff immediately went to work to develop new online forms and processes.

USAC implemented program changes in 2013 to support the requirements of the

issued by the FCC in December 2012. Rural Health Care (RHC) Program staff worked in partnership with the FCC to navigate the implementation of policy and steer applicants in the right direction.

The was created to encourage applicants to form state and regional broadband health care networks and to apply for universal service support. To help applicants stepping into new program roles, RHC Program staff devised strategies that would build new infrastructure and lay the groundwork for a smooth transition.

In 2013, program staff immediately went to work to develop new online forms and processes.

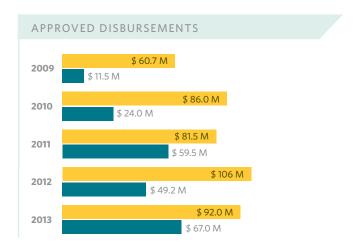

, received an upgrade to adapt to these fast-changing rules and requirements. Program staff successfully launched four new HCF Program forms online in 2013. The online

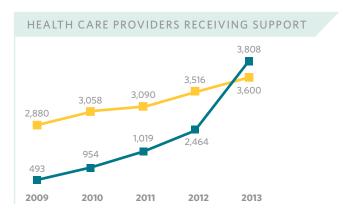

forms make it easier for applicants to request services and funding. Program staff also introduced improved functionality for the Telecommunications and Internet Access Programs that reduced processing errors and helped service providers receive their payments faster.

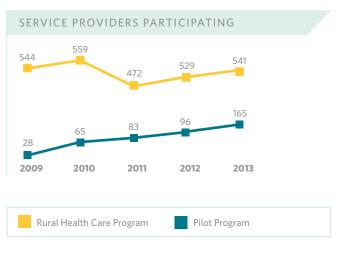

Meanwhile, ongoing RHC Program operations continued to mature. The , formerly the Primary Program, received over 5,000 requests for services in Funding Year (FY) 2013, a 6.8-percent increase over FY2012. was brought in-house effective July 1 providing cost savings and operational efficiencies for USAC. In 2013, program staff issued 30 additional funding requests for total cumulative commitments of \$366.5 million, processed over 400 invoices, and disbursed over \$33 million to Pilot Program projects. Since the start of the Pilot Program, USAC has disbursed almost \$212 million.

USAC to equip HCF Program participants with the crucial information they would need to apply for universal service support. The campaign began with a webinar that introduced the HCF Order, giving clear, straightforward answers to applicants' questions. Further outreach efforts gave applicants the confidence to maneuver through new program requirements and helped them stay current on upcoming trainings and deadlines.

USAC provided instruction that focused on new HCF Program topics to nearly 400 participants at three live trainings. Applicants could attend trainings in person or online and access training materials on the USAC website. USAC hosted conference calls to answer frequently asked questions and created five video tutorials made available through USAC's online learning library. USAC communicated with over 50,000 people in 2013 through email and the program's two newsletters: the and the monthly HCF Bulletin.

Demand for E-rate Program support continued to remain strong as USAC focused on customer service.

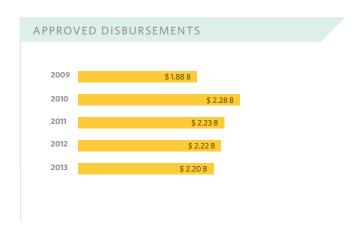

Demand for Schools and Libraries (E-rate) Program support continued to remain strong for Funding Year (FY) 2013. USAC focused on delivering decisions to applicants and providing the highest level of customer service.

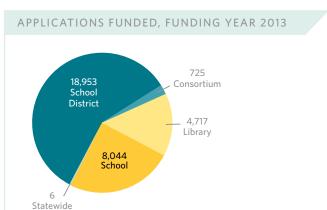

More than 45,000 applications were received, seeking nearly \$5 billion in E-rate Program funds. Within this pool were almost 95,400 schools or school districts and nearly 11,700 libraries. The demand for support for telecommunications, telecommunications services, and Internet access (Priority One services) totaled \$2.71 billion, a 10.8 percent increase from the previous year, owing mostly to requests for greater bandwidth. The demand for support for internal network connections and maintenance of internal network connections (Priority Two services) at schools and libraries was \$2.28 billion, an 18.5 percent decrease from the previous year.

USAC responded quickly to applicants and service providers to help program participants get the information they needed. By the end of 2013, USAC issued funding decisions for 90 percent of FY2013 Priority One applications

. This total represented 60 percent of all dollars requested for Priority One support. USAC paid nearly 98 percent of invoices within 30 days of receipt and issued decisions on a majority of appeals within 60 days of receipt. USAC also handled a large volume of phone inquiries, answering over 49,000 calls with nearly 98 percent of questions resolved on the first call.

In early June, President Obama introduced ConnectED, an initiative to connect 99 percent of America's students to the Internet through high-speed broadband and high-speed wireless service within the next five years. In July, the FCC opened a rulemaking proceeding, seeking comment on how to modernize the E-rate Program. USAC looks forward to working with the FCC to implement program changes.

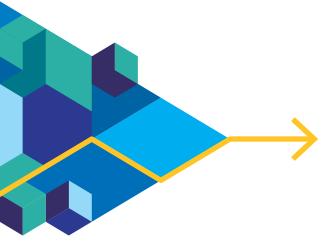

E-rate Program

included two spring trainings for service providers that supported nearly 400 attendees, and eight applicant fall trainings across the country that supported over 1,450 attendees. Applicants learned about general E-rate Program rules, essential program updates, revised FCC forms, eligible services, and audits. In addition, program staff instructed applicants how to better navigate the application process.

The

team completed 830 HATS-type visits in 2013 with 62 visits conducted in person, 197 by telephone, and 571 in targeted outreach projects. Applicants were provided help in a variety of subject matter areas so that they would be successful during the application process. In 2013, the HATS team initiated outreach with applicants in 50 states, Puerto Rico, Guam, and the Northern Mariana Islands.

MANAGEMENT'S DISCUSSION AND ANALYSIS

MISSION AND STRUCTURE

The Universal Service Administrative Company (USAC) is a not-for-profit corporation that was formed in 1997 to administer the federal universal service support programs and the universal service fund (USF) in accordance with Federal Communications Commission (FCC) rules.

USAC collects and distributes funds, works to protect the integrity of the universal service programs – High Cost, Lifeline, Rural Health Care, and Schools and Libraries – promotes compliance among program participants, and provides information about universal service to Congress, the FCC, program audiences, and the general public.

In all these tasks, USAC strives to provide efficient, responsible stewardship of the programs and the USF, a key national asset in making important telecommunications and Internet services available to consumers, health care providers, schools, and libraries throughout the United States.

FCC regulations governing USAC are found in Part 54 of Title 47 of the Code of Federal Regulations (47 CFR Part 54). These regulations required USAC to establish three program divisions: High Cost and Low Income, Rural Health Care, and Schools and Libraries. The program divisions are supported by additional USAC personnel in External Relations, Finance, General Counsel, Human Resources and Operations, Information Systems, and Internal Audit. Consistent with FCC rules, USAC does not make policy for or interpret unclear provisions of statutes or the FCC's rules.

PERFORMANCE MEASURES

USAC is required to report quarterly to the FCC on performance measures pursuant to a Memorandum of Understanding signed in September 2008. This information pertains to USAC's administration of the programs and the universal service fund.

SYSTEMS, CONTROLS, AND LEGAL COMPLIANCE

USAC has a formal internal controls structure and review process consistent with the guidance in Office of Management and Budget (OMB) Circular A-123 titled "Management's Responsibility for Internal Control," including Appendix A (Implementation Plans). In 2013, USAC's internal controls group continued to enhance USAC's overall internal controls framework with their documentation and assessment program, including maintaining up-to-date policies and procedures. No material weaknesses were identified during the 2013 internal controls assessments. In addition to annual internal controls assessments, USAC contracts with an independent audit firm to perform an annual audit of its financial statements as well as agreed upon procedures in compliance with the requirements in 47 CFR Part 54. The FCC's auditors also audit the universal service fund as part of the annual FCC financial audit.

USAC's current financial management system is a widely used and commercially accepted accounting system. However, as the administrator of universal service, it is the responsibility of USAC's management to be in compliance with laws and regulations applicable to the universal service fund. The 2013 audit of the FCC's financial statements identified a non-compliance with the Federal Managers Financial Integrity Act of 1982. The non-compliance noted was that the financial systems of the FCC's reporting components (e.g., USAC as the administrator of the universal service fund) do not achieve the federal financial system integration standards as determined by OMB. Although USAC's financial systems are not currently compliant with OMB standards, we have compensating controls in place to ensure all financial data is accurate and meets the requirements of the FCC.

FINANCIAL INFORMATION

The accompanying USAC unaudited financial statements and tables are the responsibility of USAC management and reflect all necessary adjustments and reclassifications that are necessary for fair presentation of the period presented. The results for the year ended December 31, 2013, are not considered final until the 2013 financial statement audit is completed by our independent auditors. These unaudited financial statements and tables should be used in conjunction with the audited financial statements and the notes thereto for the years ended December 31, 2012, and 2011, included herein.

The table on the right presents	s selected data about USAC's staffing and

To the Board of Directors of Universal Service Administrative Company:

REPORT ON THE FINANCIAL STATEMENTS

We have audited the accompanying financial statements of Universal Service Administrative Company (the Company), which comprise the statement of financial position as of December 31, 2012 and 2011, and the related statements of operations and change in unrestricted net assets, and cash flows for the years then ended, and the related notes to the financial statements.

MANAGEMENT'S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in the Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and 2011, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

OTHER MATTERS

Our audit was conducted for the purpose of forming an opinion on the basic financial statements as a whole. The additional supplemental schedules listed in the table of contents are presented for the purposes of additional analysis and are not a required part of the financial statements. These schedules are the responsibility of the Company's management. Such schedules have not been subject to the auditing procedures applied in our audits of the basic financial statements and, accordingly, we express no opinion on them.

OTHER REPORTING REQUIRED BY GOVERNMENT AUDITING STANDARDS

In accordance with Government Auditing Standards, we have also issued our report dated June 7, 2013 on our consideration of the Company's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations and contracts and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Company's internal control over financial reporting and compliance.

Notes to Financial Statements

As of And For the Years Ended December 31, 2012 and 2011

ORGANIZATION AND BASIS OF PRESENTATION

The Universal Service Administrative Company ("USAC" or the "Company") was incorporated, effective September 17, 1997, as a not-forprofit, independent, wholly-owned subsidiary of the National Exchange Carrier Association Inc. ("NECA"), and appointed by the Federal Communications Commission ("FCC") to administer the Universal Service Fund ("USF") and the universal service support mechanisms. USAC's Board of Directors consists of independent directors representing a crosssection of stakeholders in the USF and the universal support mechanisms. Pursuant to 47 C.F.R. § 54.703(a), USAC's Board of Directors is separate from NECA's Board of Directors and NECA is prohibited from participating in USAC's functions.

The FCC, in its Report and Order in CC Docket Nos. 96-45 and 97-21 ("Universal Service Order") released May 8, 1997 and November 20, 1998, respectively, determined that USAC should serve as the permanent administrator of the High Cost, Low Income, Rural Health Care, and Schools and Libraries Universal Service Support Mechanisms, collectively referred to herein as the "Programs," established pursuant to Section 254 of the Communications Act of 1934, as amended.

USAC, as the administrator of the USF, performs billing, collection, and disbursement functions. It also collects information regarding contributing entities' and end-user telecommunications revenues, and submits projections of demand, administrative expenses for the Programs, and quarterly universal service contribution data to the FCC.

The functions of USAC as the administrator of the USF also include, but are not limited to, development of applications and associated instructions as needed for the Programs, administering the application process consistent with applicable FCC rules and related operational infrastructure for such processes, performing outreach and public education

functions, performing audits of contributing telecommunications carriers reporting information to USAC as required under 47 C.F.R. Part 54, Subpart H, performing audits of telecommunications carriers receiving High Cost and/or Low Income Program benefits, and schools, libraries, and rural health care providers and beneficiaries receiving program benefits, and development and implementation of other functions unique to the Programs.

Funds collected by USAC from telecommunications carriers required to contribute to the USF pursuant to 47 U.S.C. § 254 and 47 C.F.R. § 54.706 are restricted as to their intended use related to the Programs discussed above. The cash and other financial assets USAC holds and administers for the benefit of the USF are reported at fair value in the Statements of Financial Position as assets held for the Federal USF, with an equal amount recorded as liabilities related to assets held for the Federal USF. Activities related to the USF are not presented in USAC's Statements of Operations and Change in Unrestricted Net Assets and Statements of Cash Flows.

NECA, a related party to USAC, performs data collection functions for the High Cost Program pursuant to FCC rules and bills USAC for the associated costs. NECA is compensated by USAC in accordance with NECA's Cost Accounting and Procedures Manual. For the years ended December 31, 2012 and 2011, the expense recognized for services rendered by NECA was \$450,255 and \$427,501, respectively. These expenses are included in contractual expenses in the accompanying Statements of Operations and Change in Unrestricted Net Assets. At December 31, 2012 and 2011, amounts due to NECA were \$81,890 and \$46,748, respectively.

The accompanying financial statements have been prepared on the accrual basis of accounting, in conformity with the accounting principles generally accepted in the United States of America.

2 SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fixed Assets — Fixed assets consist of office furniture, office equipment, computer hardware, computer software and leasehold improvements. These assets are carried at cost, net of accumulated depreciation and amortization. Projects in progress consist primarily of development costs of internal use software. Depreciation of furniture and equipment is calculated on a straight-line basis over the seven-year estimated useful lives of those assets. Depreciation and amortization of hardware and software is calculated on a straight-line basis over the three-to five-year estimated lives of those assets. Amortization of leasehold improvements is calculated on a straight-line basis over the shorter of the remaining period of the respective leases or estimated useful lives of the improvements. Maintenance and repairs are expensed to operations as incurred.

Impairment of Long-Lived Assets — The Company evaluates long-lived assets for impairment who never events as changes in

impairment whenever events or changes in circumstances indicate that the carrying value of an asset may no longer be recoverable. If the estimated future cash flows (undiscounted and without interest charges) from the use of an asset were less than the carrying value, a writedown would be recorded to reduce the related asset to its estimated fair value.

Receivable from the Federal USF — USAC bills the USF monthly on the basis of net cash disbursements. Collections against the

receivable are collected in full from the USF by USAC at the beginning of the subsequent month.

Advance from the Federal USF — Represents cash advanced by the USF that allows USAC to make operating disbursements without placing USAC in a negative cash position. The amount is subject to adjustment to account for expected increases or decreases in cash-flow requirements.

Deferred Revenue — Represents the portion of revenues billed and/or collected through the Receivable from the Federal USF process where the corresponding expense is being recognized on the accrual basis and lags behind the disbursement used to bill revenue. Deferred revenue is typically generated by capital or prepaid disbursements.

Revenue — USAC, as the administrator of the USF, recognizes revenue when services are rendered. Revenues are equal to the cost of providing administrative support to the USF and the Programs, and to other FCC fund administrators. Such costs are paid by USF and by the other FCC fund administrators to USAC. These transactions are considered exchange transactions in accordance with the AICPA's Audit and Accounting Guide for Not-for-Profit Entities. The other FCC fund administrators provide administrative support for the Telecommunications Relay Services ("TRS"), North American Numbering Plan ("NANP"), and Local Number Portability ("LNP") programs. USAC invoices these administrators for direct and indirect charges it incurs each month for the data collection and management functions on their behalf.

Concentration of Credit Risk — Financial instruments that potentially subject USAC, as the administrator of the USF, to concentration of credit risk consist principally of cash, cash equivalents, short-term and long-term investments, and receivables from contributors. USAC, as the administrator of the USF, places its cash, cash equivalents, and short-term and long-term investments with high quality credit institutions. USAC, as the administrator of the

USF, maintains its cash and cash equivalents with financial institutions which are federally insured under the Federal Depository Insurance Corporation Act ("FDIC"). The total deposits at these institutions are generally in excess of federally insured amounts. Deposits in excess of federally insured amounts are collateralized up to \$650 million by securities which consist primarily of United States Treasury debt securities. USAC has not experienced any losses on its cash and cash equivalents. In the normal course, USAC also has invested cash held for the benefit of the USF in U.S. Treasury securities, which are classified under Assets held for the Federal USF.

3 ACTIVITIES RELATED TO THE FEDERAL USF

As discussed in Note 1, the cash and other financial assets of the USF, which USAC administers and acts as an intermediary for, are reported at fair value in the Statements of Financial Position as assets held for the Federal USF, with an equal amount recorded as liabilities related to assets held for the Federal USF. The summary of assets applicable to the USF included below provides additional detail with respect to these amounts.

	DECE	MBER 31
In thousands	2012	2011
ASSETS		
CURRENT ASSETS		
Cash and cash equivalents	\$ 648,899	\$ 490,948
Investments	3,115,103	2,269,145
Accounts receivable	1,391,688	1,478,527
Allowance for doubtful accounts	(558,781)	(528,263)
Interest receivable	5,030	7,393
Total Current Assets held for the Federal USF	\$ 4,601,939	\$ 3,717,750
Fixed Assets	5,486	6,970
Investments	2,769,040	2,932,730
Total Assets Held for Federal USF	\$ 7,376,465	\$ 6,657,450

Cash and Cash Equivalents — USAC, as the administrator of the USF, considers all highly liquid securities with an original maturity of three months or less as of the financial statement date to be cash equivalents.

Short-Term Investments — USAC, as the administrator of the USF, considers all securities purchased with an original maturity of greater than three months and a current maturity of less than or equal to one year to be short-term investments. Short-term investments consist solely of United States Treasury securities with readily determinable fair values. USAC, as the administrator of the USF, accounts for its investments in accordance with investment accounting standards for not-for-profit organizations. At December 31, 2012 and 2011, there were \$3.12 billion and \$2.27 billion in short-term investments, respectively.

Long-Term Investments — USAC, as the administrator of the USF, considers all securities purchased with a current maturity of greater than one year to be long-term investments. These investments are accounted for in accordance with fair value measurement accounting standards. Long-term investments consist primarily of United States Treasury debt securities with readily determinable fair values, none of which have maturities greater than three years. At December 31, 2012 and 2011, there were \$2.77 billion and \$2.93 billion in long-term investments, respectively.

Accounts Receivable and Allowance for Doubtful Accounts — USAC, as the administrator of the USF, recognizes accounts receivable arising from amounts billed to contributors and the recovery of funds from service providers and beneficiaries, which remain unpaid. Accounts receivable are recorded at invoiced amounts and generally do not bear interest. Based on the Debt Collection Improvement Act ("DCIA"), all receivables over 90-days delinquent are transferred to the United States Treasury for collection, except for receivables where the debtor has appealed the validity of the amount owed or the debtor

has sought protection under Chapter 7 or 11 of the United States Bankruptcy Code. The DCIA receivable balances transferred to the Treasury remain as USF receivables. All receipts of DCIA transferred receivables are held by USAC for the benefit of the USF and, if collected, are transferred by the FCC to USAC for the benefit of the USF.

Gross receivables are reduced to net realizable value by the allowance for doubtful accounts, which reflects the Company's estimate of exposure to risk of nonpayment of billed balances, determined principally on the basis of its collection experience. The allowance includes reserves for identified bankruptcies, identified inactive contributors, delinquent amounts that are referred to the United States Treasury for collection, and other items. Management periodically reviews such estimates and management's assessment of recoverability may change based on actual results.

Accounts receivable write-offs are periodically submitted by USAC to the FCC for approval. Generally, each account has been outstanding more than five years prior to write-off consideration. USF write-off policy is determined based on the FCC Policies and Procedures Manual, Chapter 4: Accounts Receivable and Revenues, Section 360: Cancellation, Termination, Write-Off and Close-out Policy of Delinquent Debt. The Commission's authority to write-off is set forth in 31 U.S.C. § 3711, and 31 C.F.R. Parts 902-904, Federal Claims Collection Standards ("FCCS").

FIXED ASSETS

Fixed Assets as of December 31, 2012 and 2011 are as follows:

	DECEN	MBER 31
In thousands	2012	2011
FIXED ASSETS		
Office furniture	\$ 2,378	\$ 2,017
Office equipment	225	229
Computer hardware	6,592	3,267
Computer software	23,056	23,792
Leasehold		
improvements	2,405	1,900
Projects in progress	48	712
Total Fixed Assets	\$ 34,704	\$ 31,917
Less accumulated		
depreciation and		
amortization	(29,218)	(24,947)
Net Fixed Assets	\$ 5,486	\$ 6,970

Depreciation and amortization expense was \$4,587 and \$6,452 for the years ended December 31, 2012 and 2011, respectively.

5 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value measurement accounting standards establish a common definition for fair value to be applied to accounting principles generally accepted in the United States requiring use of fair value. These standards establish a framework for measuring fair value and expand disclosures about such fair value measurements. These standards also clarify that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a marketbased measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability.

As a basis for considering assumptions, fair value measurement accounting standards establish a three-tier fair value hierarchy which prioritizes the inputs used in measuring fair value. Fair value measurement accounting standards require that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access;

Level 2 — Inputs, other than quoted prices in active markets for similar assets or liabilities, that are observable either directly or indirectly; and

Level 3 — Unobservable inputs for which there is little or no market data, requiring the reporting entity to develop its own assumptions (i.e., separate accounts tailored and managed by a portfolio manager).

USAC, as the administrator of the USF, utilizes the best information available in measuring fair value, and financial assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurement.

The following table summarizes the valuation of the investments according to the fair value measurement classifications as of December 31, 2012:

In thousands	US Treasuries
Total	\$ 5,884,143
Active Markets for Identical Assets (Level 1)	\$ 5,884,143
Observable Inputs (Level 2)	\$ 0
Unobservable Inputs (Level 3)	\$ O

The following table summarizes the valuation of the investments according to the fair value measurement classifications as of December 31, 2011:

In thousands	US Treasuries
Total	\$ 5,201,875
Active Markets for Identical Assets (Level 1)	\$ 5,201,875
Observable Inputs (Level 2)	\$ O
Unobservable Inputs (Level 3)	\$ 0

✓ INCOME TAXES

USAC is a not-for-profit corporation subject to income taxes, including those that arise from the permanent and temporary differences between financial and tax accounting related to meals and entertainment expense, compensated absences and depreciation. Income taxes for 2012 and 2011 are not material and are included as a component of general and administrative expenses.

7 COMMITMENTS AND CONTINGENCIES

Fixed Contract Commitments

Bank of America Agreement — On June 22, 2009, USAC entered into an agreement with Bank of America ("Bank of America Agreement") for banking and investment management services. The Bank of America Agreement is a four-year contract that runs from July 1, 2009 to June 30, 2013. Bank of America provides banking and investment management services for a fixed annual contractual amount that may be satisfied by funds derived by Bank of America from the investment of balances maintained in demand deposit accounts. The Bank of America contract is a cancellable agreement.

Solix Agreement — Solix, Inc. provides to USAC contracted program operations services for the Schools and Libraries and Rural Health Care Programs. On March 27, 2012, USAC signed a contract extension with Solix for a period of two years or until June 30, 2014. The future contractual required payments for the period January 1, 2013 through June 30, 2014, under the Agreement for both the Schools and Libraries and Rural Health Care Programs total \$62.2 million.

Lease Commitments

USAC leases its office space under an operating lease agreement expiring on November 30, 2020. At December 31, 2012, the future minimal rental payments under these leases are as follows (in thousands):

TOTAL	\$ 28,468
2020	3,754
2019	4,002
2018	3,904
2017	3,808
2016	3,705
2015	2,893
2014	3,241
2013	\$ 3,161

Rent expenses under operating leases were \$3.2 million and \$2.7 million for the years ended December 31, 2012 and 2011, respectively.

Legal Disputes

The Company (USAC) is involved in various legal proceedings and claims incidental to the normal conduct of its business. The Company reports matters herein where the value of a claim asserted by or against the Company exceeds \$500,000 or more for an individual matter, or for matters relating to the same plaintiff or defendant that in the aggregate amount to \$500,000 or more. The Company reports the following matters:

 A complaint was filed against the Company on December 28, 2007 by a Schools and Libraries Support Mechanism service provider (plaintiff) in Texas alleging the Company failed to make payments on approved funding requests for a support mechanism applicant. Plaintiff seeks to recover liquidated damages of approximately \$778,000 plus exemplary damages of three times this amount. On September 22, 2008, the United States District Court for the Southern District of Texas dismissed plaintiff's claim without prejudice. Plaintiff appealed the district court's decision to the United States Court of Appeals for the Fifth Circuit. In addition, plaintiff appealed the

Company's decision to withhold program funding to the Federal Communications Commission pursuant to 47 C.F.R. Part 54. Subpart I. On August 28, 2009, the FCC Wireline Competition Bureau (Bureau) released an order (DA 09-1946) affirming the Company's decision and directing plaintiff and the Company to take certain actions toward resolving the matter. Plaintiff then filed a Petition for Reconsideration of a portion of the Bureau's decision with the Commission on September 27, 2009. On July 1, 2010, the Deputy Chief of the Bureau released an order (DA 10-1244) denying plaintiff's petition for reconsideration of the Bureau's August 28, 2009 decision. On July 30, 2010, plaintiff filed a petition requesting that the FCC reverse the Bureau's July 1, 2010 order. On January 10, 2012, the FCC issued an order (FCC 12-08) denying plaintiff's petition and holding that Company acted appropriately. On March 8, 2012, the Fifth Circuit Court of Appeals vacated the district court's dismissal of plaintiff's complaint and remanded the case back to the district court for adjudication of the state law tort claims. On July 7, 2012, the Company answered plaintiff's amended complaint and also filed a motion requesting the court grant summary judgment in Company's favor. The matter is now pending before the court.

At the present time the Company is unable to estimate whether an unfavorable outcome is likely in the matter pending before the court or the amount or range of potential loss, if any.

A complaint was filed against the Company on November 7, 2009, by the Chapter 7 bankruptcy trustee for a Schools and Libraries Support Mechanism service provider (plaintiff) in federal bankruptcy court in Texas demanding turnover of \$20,112,899 in program funds frozen due to allegations of fraud involving service providers in the Houston and Dallas Independent School Districts. The Company filed a motion to dismiss the action or, in the alternative, remove the action from

the bankruptcy court to the overseeing federal district court. The bankruptcy court held a hearing on this matter on March 19, 2010. On April 5, 2010, the bankruptcy court issued a report and recommendation to the overseeing federal district court that the matter be removed from the bankruptcy court, as requested by the Company. The bankruptcy court did not rule on the Company's motion to dismiss, which remained in the district court for adjudication. On December 3, 2010, the parties agreed to suspend the litigation for six months to provide the Company an opportunity to review and approve or deny payments of outstanding invoices submitted by plaintiff for services provided to the Houston and Dallas school districts. The Company completed the invoice reviews and issued denials of payment and rescission of commitments notices to plaintiff on March 29, 2011.

On May 31, 2011, plaintiff filed a petition with the FCC, pursuant to 47 C.F.R. Part 54, Subpart I, for review of the Company's denials of payment and rescission of commitment notices issued to plaintiff on March 29, 2011. The crux of the petition is not that the Company failed to adhere to FCC rules or orders, but that the FCC orders upon which the Company relied to revoke the funding decisions and seek recovery of paid invoices were improvidently issued by the FCC and should be rescinded, or that the application of the rules should be waived by the FCC in this case. In addition, the petition alleged that plaintiff was misled by the Company into performing work for the Houston Independent School District (HISD) in 2007. During this time period, the Department of Justice (DOJ) investigation was underway. It has been the Company's longstanding practice that it may not disclose its knowledge of FCC and/or DOJ investigations absent express permission from the FCC to do so. It has also been the Company's longstanding practice that it will not make disbursements to program beneficiaries that are under law enforcement investigation. Plaintiff claims that the Company failed to disclose the real reason for the hold on plaintiff's invoices, which caused plaintiff to complete work for HISD that it would not have performed if it had known the real reason for the payment hold.

On November 28, 2011, the FCC released an order (FCC 11-175) denying plaintiff's appeal of the Company's invoice denials. With regard to that order, the FCC found that: (i) HISD selected its service providers well before the completion of the 2002-2004 competitive bidding processes. For funding year 2003, HISD selected a predecessor entity to plaintiff, 24 days before the close of the 28-day competitive bidding process; (ii) HISD employees accepted substantial gifts from the predecessor entity, which tainted the competitive bidding process; and (iii) HISD did not have a signed contract in place with a service provider when it filed its FCC Form 471 for Funding Year 2002.

In addition, on June 3, 2011, plaintiff filed an amended complaint alleging claims for unjust enrichment, negligent misrepresentation and fraud based upon the same general allegation of misrepresentation contained in its petition for review to the FCC. In response to the amended complaint, on June 27, 2011. the Company filed a motion requesting the court dismiss the complaint because plaintiff should be required to exhaust its administrative remedies before the FCC in this matter, which it has not yet done, and the FCC has primary jurisdiction to interpret its program rules. Plaintiff filed a response to the Company's motion on August 8, 2011. The Company filed a reply to plaintiff' response on September 7, 2011. With the issuance of the FCC order on November 28, 2011, plaintiff has effectively exhausted its administrative remedies. Plaintiff appealed the FCC's November 28, 2011 order to the United States Court of Appeals for the Fifth Circuit. On July 5, 2012, Plaintiff and the Company agreed to suspend the litigation in the district court until the Fifth Circuit Court of Appeals ruled on Plaintiffs' appeal

of the FCC's order issued on November 28, 2011. On November 6, 2012, the Fifth Circuit Court of Appeals rejected the petition for review by Plaintiff of the FCC's order. Plaintiff subsequently agreed to dismiss its complaint with prejudice against USAC in the bankruptcy court. This matter is now closed and will not be reported in the future. The United States Department of Justice has also filed a related \$20 million claim against plaintiff for violations of the Federal False Claims Act.

The Company is vigorously defending the open matter described above. Although it is impossible to predict the outcome of these or any of the other outstanding legal proceedings involving the Company, the Company believes that such outstanding legal proceedings and claims, individually and in the aggregate, are not likely to have a material effect on its financial position or results of operations.

RETIREMENT PLANS

USAC has a 401(k) Retirement Savings Plan covering all USAC employees. The plan is both contributory and noncontributory and all contributions are subject to certain limitations as prescribed by the plan document and government regulations. Employees are immediately vested in the employer contribution, which is funded on a current basis. Employer contributions charged to operations were \$2.8 million and \$2.4 million through December 31, 2012 and 2011, respectively.

9 SUBSEQUENT EVENTS
USAC has performed an evaluation of subsequent events through June 7, 2013 which is the date the financial statements were available to be issued.

Banking Agreement — USAC has selected Bank of America to continue as its banking and investment management services provider, effective July 1, 2013. The agreement is a 2-year contract, with 3 one-year options.

INDEPENDENT **AUDITOR'S REPORT**

DP George & Company

2121 Eisenhower Avenue, Suite 606 Alexandria, VA 22314 Telephone 703-229-4437

on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

To the Board of Directors of Universal Service Administrative Company:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of Universal Service Administrative Company (the Company) which comprise the statement of financial position as of December 31, 2012, and the related statements of operations and change in unrestricted net assets, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated June 7, 2013.

INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of the Company is responsible for establishing and maintaining effective internal control over financial reporting. In planning and performing our audit, we considered the Company's internal control over financial reporting to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies. Given these limitations,

during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

We noted certain matters that we will report to management of the Company in a separate letter.

COMPLIANCE AND OTHER MATTERS

Management of the Company is responsible for compliance with laws and regulations. As part of obtaining reasonable assurance about whether the Company's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations and contracts, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

PURPOSE OF THIS REPORT

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Company's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the organization's internal control and compliance. Accordingly, this communication is not suitable for any

2013 UNIVERSAL SERVICE PROGRAM STATISTICS

The following pages contain data from the four universal service programs administered by USAC. To better understand the data, please note the difference between disbursements and commitments as well as program/funding year versus calendar year.

FUNDING YEAR

For the Rural Health Care and Schools and Libraries programs, a funding year runs from July 1 to June 30 of the following year.

CALENDAR YEAR

The High Cost and Lifeline programs disburse funds on a calendar year basis. Data in these tables are for calendar year 2013.

APPROVED DISBURSEMENTS

Approved disbursement totals represent support for the months of January through December 2013 for the High Cost and Lifeline programs. Approved disbursement totals represent support authorized during the months of January through December 2013 for the Rural Health Care and Schools and Libraries programs. Final disbursement totals could change because of subsequent administrative actions related to approved disbursements. Disbursement data in the calendar year tables may represent multiple funding years in the Rural Health Care and Schools and Libraries programs.

FUNDING COMMITMENTS

CONTENTS

Funding commitments are not disbursements. Funding commitments are issued by the Rural Health Care and Schools and Libraries programs via commitment letters that approve what will be funded through support for a particular funding year.

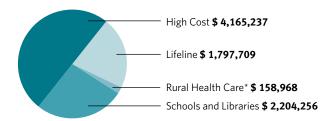

Commitments made in calendar year 2013 may be for applications filed during previous funding years and the current funding year.

RURAL HEALTH CARE AND SCHOOLS AND LIBRARIES PROGRAMS

Period	Start Date	End Date
Funding Year 2011	July 1, 2011	June 30, 2012
Funding Year 2012	July 1, 2012	June 30, 2013
Funding Year 2013	July 1, 2013	June 30, 2014
