I have read the comments on modernizing Form 470. Most of the comments I have read pertain to Category 1; however, I find filing for Category 2 to be just as confusing. Checking the wrong box can have a devastating effect on the whole process and jeopardize reimbursements to entities with tight budgets that rely on reimbursements to provide services to communities with high poverty. I believe that a logic/decision tree or a question guide similar to those found in tax software would be very helpful in guiding applicants through the decision process with respect to choosing between Internal Connections and BMIC.
