

I would like to express our need for CyberSecurity and redundant Internet connections are added to the qualifying E-rate list. Cybersecurity as something we must plan for is beginning to take up more and more of our time and budget. If we do not have access to these resources and are crippled from an attack our student's ability to complete classwork and their education are also adversely affected. The need for redundant internet connections is also something that needs to be added. We ourselves suffered a DDOS attack, which prevented teachers from teaching, this could have been avoided with redundant internet connections.
