On March 27, 2025, USAC submitted a demand estimate for the E-Rate program for funding year 2025.<sup>2</sup> USAC estimates the total demand for funding year 2025 will be \$3.225 billion, which includes estimated demand for category one services of \$1.806 billion, and of \$1.418 billion for category two services.<sup>3</sup>

The Bureau announced that the E-Rate program inflation-based cap for funding year 2025 is \$5.059 billion.<sup>4</sup> Additionally, as of March 31, 2025, USAC projects that \$500 million in unused funds from prior funding years is available for use in E-Rate funding year 2025.<sup>5</sup>

Category one services include telecommunications, telecommunications services and Internet access. Category two services include internal connections, basic maintenance of internal connections and managed internal broadband services.

<sup>5</sup> As of March 31, 2025, USAC projects that \$500 million will be available as carry forward funds for funding year 2025. See USAC Third Quarter 2024 USF Size Projections, at 59-60.

\$500 million,<sup>7</sup> there is sufficient funding to fully fund all category one and category two funding requests for funding year 2025. We therefore direct USAC to fully fund eligible category one and category two requests submitted for funding year 2025. We also direct USAC to use \$500 million in E-Rate funds unused from prior years to offset the collection requirements needed to fully meet demand for such services.<sup>8</sup>
